teachers and students) for this amazing, informative and enjoyable chat. How about meeting again in this platform on any other day and at any other time? :)

We don't trust everyone who meets on the internet. This is why I used to have a lot of trouble. But now I get smarter, when problems overlap, people learn what to do...

How do you think the media affects the pandemic process?

Media is a really important factor in this process.

Cristina Cernei 15:22

Due to the abundance of information it becomes too difficult to check the sources which is vital in not being misinformed. That is why we need to learn what are the reliable resources and still learn to make research and always doubt what is presented. Today the question WHY is vital.
